FOR IMMEDIATE RELEASE

American Insulated Glass Opening New Location in Birmingham

AIG positioned to be the only full-service glass fabricator in this market

Atlanta, Ga. February 13, 2018—American Insulated Glass, LLC (“AIG”) announced today it will be opening a third glass fabrication and wholesale distribution facility to better serve customers in the Southeastern part of the U.S. Located in Birmingham, Alabama, this facility will be equipped with state-of-the-art technology, including a new commercial Lisec IG line, Hegla cutting table with retrieval system, and a new HHH supported full convection tempering oven—designed to produce the highest quality soft-coat low-e glass offered to the industry.

With plants already located in Georgia and Florida, this new location will allow AIG to offer shorter lead times and a broad range of fabricated and stock glass to glazing contractors and millworkers in Alabama and Tennessee— to include servicing the Nashville market. Industry veteran, Chris Gould, will be the general manager.

Billy Blair, Chief Executive Officer of AIG, commented, “We expect the Birmingham plant to be fully operational by spring 2018. The financial investment we are making demonstrates our commitment to serving our customers with the most complete offering of commercial and residential glass products, combined with the highest level of quality and service available.” For more information call 404-361-9154, or email us at info@aiglass.com.

About American Insulated Glass

American Insulated Glass, LLC is a leading fabricator and wholesale distributor in the Southeast, specializing in providing high quality insulated, laminated, tempered, and beveled glass to glazing contractors and the millwork industry. Dedicated to serving both commercial and residential end markets, AIG also distributes a full line of mirror, decorative, and other glass products. Acquired by AV Capital in October 2017, AIG is positioned to expand its geographical footprint and service capabilities, both organically and via acquisition. To learn more visit www.aiglass.com.
