DSTOQ

DSTOQ is a **regulated securities exchange**. Invest in real-world assets using cryptocurrencies.

Our platform allows for peer-to-peer trading of tokenized securities such as: equities, bonds, ETFs, oil and gold without the need for intermediaries. The DSQ token is a means of payment on the DSTOQ platform, which is powered by the Stellar blockchain. Our license enables us to conduct Initial Public Offerings (IPOs) and create unique tokenized securities.

MARKET

The market capitalisation of all the world's stock markets is $73tn and is limited to leading stock exchanges. Emerging markets have a funding gap of $5.2tn, despite $180bn of funding flowing into startups, capital is largely excluded from emerging markets.

At the same time the global crypto-community lacks investment opportunities outside the token economy, and companies lack access to crypto capital.

PRODUCT

Our MVP is fully integrated with the Stellar Decentralized Exchange. This enables peer-to-peer trading of tokenized securities. With 2-5 seconds for trade execution and settlements, DSTOQ is 100 000x faster than traditional stock exchanges (usually 2-5 days).

The product is decentralized by design – you will control your funds and execute **all transactions on-chain**. The MVP is currently running on the Stellar testnet and can be independently verified through any Stellar block explorer.
