

## Liventus Technology Services Earns Microsoft Gold Application Development Competency

**BANGALORE, India, May 25, 2017**—Liventus Technology Services, Pvt. Ltd., a custom application development firm, is proud to announce it has achieved Microsoft Gold Application Development competency. The distinction highlights the ever-growing company's ability to provide "best-in-class" and enterprise services to Microsoft Corp. customers.

"As technology evolves, the need for talent to keep abreast with the changes is even more challenging and our people have shown the determinism and competence to prove that we are no less than world class" said Supreeth Bhat, Managing Director of Liventus Technology Services. "The Microsoft Gold Partner status provides us the recognition for building enterprise grade solutions to our customers and clients and paves the way to open the doors to the future of rapid development & quality automation solutions."

To achieve the gold level competency, Liventus was required to demonstrate their expertise through various channels. Microsoft Certified Professionals must pass exams proving their skills meet and exceed standards. In addition to the exams, the company as a whole must present customer references attesting to their ability to successfully implement projects and satisfy customer needs.

"Liventus Technology Services continually strives to improve competency and customer service which is what makes our company a best-in-class operation. At its core, Liventus values customer satisfaction and providing leading-edge technology solutions. Achieving this Microsoft competency speaks to both those values," said CEO Sam Oliva. "With that being said, I look forward to utilizing our new skills in providing leading edge IT solutions to our clients."

Liventus' connection with the Microsoft Partner network began over ten years ago and has now reached the highest competency available. Not only does this competency further the company's ability to provide superior business technology services, but it also speaks to Liventus' dedication to customer satisfaction and exceeding expectations.

"By achieving a Gold competency, partners have demonstrated the highest, most consistent capability and commitment to the latest Microsoft technology," said Gavriella Schuster, corporate vice president, Worldwide Partner Group at Microsoft Corp. "These partners have a deep expertise that puts them in the top of our partner ecosystem, and their proficiency will help customers drive innovative solutions."

In an effort to continually offer the best service to current and future clients, Liventus is always seeking to hire talented professionals to join their team. To learn about current openings and apply, visit [careers.liventus.com](http://careers.liventus.com).
