## About Sellbery

---

Sellbery is a product feed tool to automate product export from your eCommerce platform to multiple marketplaces and shopping engines, what makes your products visible for millions of potential customers and results in significant revenue growth.

Sellbery is user-friendly and easy to understand, whether you sell one item, or 10,000 each with a unique style, brand, color, size, etc. The platform can streamline, automate and start generating results across multiple channels in a few minutes.

---

## Principle of work

---

Sellbery connects all your products to the most visited marketplaces, converts them into required data formats for each channel and keeps your listings updated across multiple accounts. Then the tool delivers orders from all channels via an automated and scalable inventory system that links directly to your web store in real-time.

---

## Benefits for the customer

---

**Save time.** The process of manual product upload to various platforms requires time. By using Sellbery, you can concentrate on more relevant tasks and let us do the monotonous work for you.

**Expand to multiple channels.** Sellbery enables easier and faster access to new marketplaces for your business.

**Unlimited import frequency.** Upload new listings when it's needed and keep everything updated.

**All channels are for free.** Sellbery doesn't charge any additional fees for platforms or channels. Enter as many marketplaces or webstores as you want. Prices are based on the number of SKU.

**Simplify the process.** There is no need to study the product upload requirements of each platform - Sellbery adjusts the product data to the specifics of each system automatically.

**Code-free solution.** You can manage Sellbery without technical background and any coding.

**Inventory & Order Sync.** Sellbery aggregates all information on orders and inventory data from each marketplace in your CMS admin panel, providing advanced management and control capabilities.

**Increase profits.** Simple mathematics – as you enter new platforms, more potential customers are attracted. As a result, more profit is generated.

## Pricing

Sellbery plans are based on the total number of SKUs in your account with no order limitations. Prices start at €19/month. To select a plan that fits the needs of your business, go the checkout page. If the number exceeds 15 000 SKU, an individual enterprise pricing plan is elaborated. One free setup is made by our account manager after first month paid subscription.

Also, a free 14-days trial is available, no credit card is required.
