

# Epomaker at Hong Kong Electronics Fair (Autumn Edition)

*Epomaker stands out at Hong Kong Electronics Fair with new releases.*

The HKTDC Hong Kong Electronics Fair (Autumn Edition) serves as a pivotal platform for global trade, collaboration, and innovation in the electronics industry. It is one of the leading annual events for the electronics sector worldwide.

Dates: October 13th - 16th, 2025

Address: 1 Expo Drive, Hong Kong Convention And Exhibition Centre, Wan Chai, Hong Kong, China

Hall: 1CON

No.: 006

The fair highlights cutting-edge technology and emerging innovations, providing a prime platform for global buyers and tech enthusiasts to explore new trends. Epomaker also made its mark at this year's event, unveiling an exciting range of new products.

## **The Epomaker Galaxy100 Lite**

This keyboard features a sleek, modern aluminum alloy casing with a Gasket mounting structure, combining high-quality pre-lubed linear switches and a five-layer cushioning system to provide smooth and silky keystroke feedback. While maintaining the premium feel of its full aluminum body, Epomaker has optimized the design to significantly reduce its overall weight, achieving a perfect balance between luxury and portability. Equipped with a customizable knob and VIA support, the Galaxy100 Lite delivers a fresh breakthrough in design.

## **The Epomaker RT85**

This keyboard combines classic design with modern functionality, offering two retro color schemes and replacing the traditional sliding switch with a rotary dial for a more contemporary user experience. The TFT module above the arrow keys serves as a clock, control panel, or display for custom animations. A joystick next to the arrow keys allows users to adjust volume and RGB lighting without the need for additional drivers, enhancing the interactive experience for gaming and multimedia applications.

## **The Epomaker Split70**

The latest ergonomic keyboard makes its debut at the fair. Designed for optimal comfort, this keyboard can be split into two parts, offering flexible typing angles to suit individual needs. Users can independently adjust the angle of each half, promoting a more natural wrist and forearm posture. The keyboard supports VIA and QMK, allowing users to remap keys, set macros, and even customize the knob. This ensures a tailored, efficient experience that maximizes

productivity and comfort.

### **The Epomaker Magcore65 Lite**

It is equipped with inductive switches, utilizing a non-mechanical, contactless sensing structure to detect key presses. This design is immune to environmental factors such as temperature, offering exceptional durability and stability. Users can calibrate each key's trigger point via online drivers, customizing key functions to suit their gaming needs, making it an ideal choice for a personalized gaming experience.

Epomaker's participation at the HKTDC Hong Kong Electronics Fair (Autumn Edition) reflects its ongoing commitment to innovation, offering a variety of products that enhance both functionality and user experience across multiple sectors.

**Photo**

A promotional poster for EPOMAKER's booth at the HKTDC exhibition. The background is a dark blue gradient with a faint, large keyboard pattern. At the top, the HKTDC and EPOMAKER logos are displayed. Below them, the text 'WE ARE AT HONG KONG' is written in large, bold, white capital letters. Underneath, 'Come Say Hi Here!' is written in a smaller, white font. The central image shows a 3D rendering of the EPOMAKER booth, which is illuminated with blue and orange lights. The booth features a large screen displaying the EPOMAKER logo and the tagline 'Elevate Typing Experience. Empower Creativity.' Below the screen, there are shelves with various EPOMAKER products. A desk with a chair is also visible. The booth is surrounded by a blue frame with the EPOMAKER logo on the sides. At the bottom, the booth information is listed: 'BOOTH Hall: 1CON No.: 006' and 'ADDRESS 1 Expo Drive, Hong Kong Convention And Exhibition Centre, Wan Chai, Hong Kong, China'. The dates 'October 13-16th 2025' are also shown. A 'CHECK OUT' button is located at the bottom right.
